

DANE COUNTY / Madison Metropolitan School District (MMSD)

The primary objective of this project is to successfully enroll or renew enrollment of Dane County families in BadgerCare+ by working with public schools and community organizations. There is particular interest in achieving renewals among families currently participating in BadgerCare+, as well as identifying uninsured children and families. Additional objectives include providing outreach about health coverage options, identifying cultural and linguistic barriers to application, and identifying barriers to BadgerCare+ renewal. CKF additionally strives to create a sustainable environment for future enrollment by improving connections between schools and community organizations that can act as referral sites for applications and complex questions.

ACKNOWLEDGEMENTS

This project is made possible through a subcontract of the Children's Health Insurance Program Reauthorization Act (CHIPRA) outreach grant awarded to the Wisconsin Department of Health Services (DHS). *Covering kids & families* was provided funding to conduct activities for the second year of the CHIPRA grant. The subcontract was originally held by the Harambee Center in Madison until that organization closed in 2010.

Wisconsin Department of Health Services

CKF would also like to thank the Madison Metropolitan School District Health Services leadership.
